

VOLVO PENTA EVC SYSTEM

SPORT FISH MODE

Designed especially for deep sea sport fishing

Sport fishing feature exclusively developed for Volvo Penta IPS

Big-game fishing will never be alike. Sport fish mode will add to your adventurous deep sea fishing trip. With the drive units pointing "toe-out", the helmsman can easily turn the stern in the direction of the fish to ensure a successful catch.

Perfect for sport fishing

Volvo Penta IPS is highly suited for sport fishing. The stern is unobstructed and the propellers are located under the hull where the risk of the line becoming entangled is minimal. For this, Volvo Penta has developed a function especially for deep sea sport fishing; the Sport fish mode.

Follow the catch

Volvo Penta IPS features individually steerable drive units that are operated electrically. In Sport fish mode the drive units are directed outward to the very maximum, giving outstanding maneuverability. When the driver operates one engine forward and the other in reverse, the torque is many times as great as when the propellers face backwards – which they always do with conventional inboard engines.

Single lever mode

By allowing twin engines to be controlled with one lever, the single lever mode makes maneuvering more secure and comfortable. Single lever mode is included in the Sport fish mode software

EVC Accessories

Smart accessories that make boating simpler and more environmentally friendly. Plug-in installation of instruments, active monitoring and troubleshooting, engine data in the chart plotter and the ability to upgrade the boat's functions at a later date. It's quick and easy to install Volvo Penta EVC Accessories in a boat equipped with Volvo Penta EVC. These are some of the options available with Volvo Penta's electronic platform, EVC

World-class performance

All Volvo Penta EVC Accessories is developed, designed & serviced by Volvo Penta. This means that it's function is perfectly matched with your Volvo Penta engine. Find out more about EVC Accessories on our website.

VOLVO PENTA

Allowing twin engines to be controlled with one lever.

Want to get out maximum joy out of your fishing trip? Combine Sport Fish Mode with Dynamic Positioning System.

Dynamic Positioning System Software
– see separate leaflet.

Volvo Penta EVC System

EVC – Electronic Vessel Control – is Volvo Penta's common electronic platform. Based on the same CAN-bus technology used in ships, planes and cars, EVC gives total integration. All information is distributed on one CAN-bus backbone. This radically reduces the amount of wiring and connectors required, leading to much higher reliability and easier installation.

EVC offers improved functionality as standard or option. Features that are impossible with standard systems and give you better safety, comfort and driving economy. Please contact your local Volvo Penta dealer for more information regarding Volvo Penta engines and Volvo Penta EVC system.
